

**SPREDOX D-401**  
DISPERSANT FOR MATTING AGENT IN  
SOLVENT BORNE SYSTEM

**DOXA**  
CHEMISTRY ENVISIONED

## Product introduction

Spredox D-401 is an polyurethane dispersant, which provides excellent viscosity reduction and stability of matting agent in the solvent based system. It is highly recommended to add it in the preparation of high concentration matting paste.

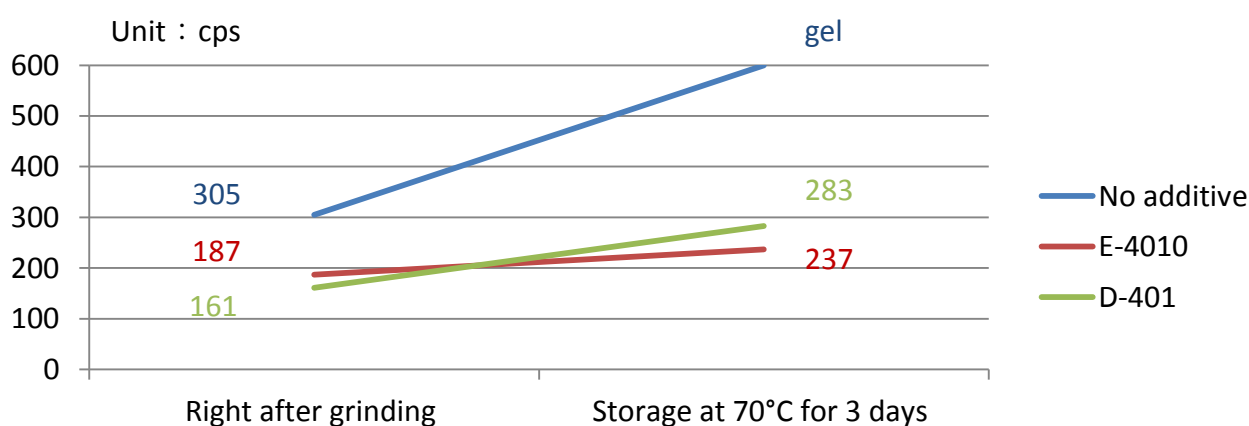

Specification	
Active content	52%
Solvent	BAC/XY/PMA

## Test Formula

Matting agent	Dispersant (52%)	BAC	TOTAL
15	6	79	100

## Viscosity reduction and stability

The stability and viscosity of the paste were measured after the dispersant was added to the high concentration matting paste.

★D-401 has best performance among all selected samples
